Globally, Aquaeco are one of the only companies to offer a complete Stainless Steel package for a truly coordinated look. All IX304 products come with a 5 year guarantee for complete

## Water Saving Solutions

Fitting a water restrictor allows you to control the amount of water a tap uses. Water usage is determined by water pressure and the size of valve in the tap. So where you have particularly high pressure a tap could be delivering unnecessary litres of water per minute. Our mixer tap restrictor is designed to give you a maximum of 10 and minimum of 6 litres of water per minute up to a pressure of 3 bar. The restrictor is screwed onto the tap outlet and

## Environmental Policy

We use the principles of reduce, re-use, recycle through the entirety of our business. We comply with all applicable legal, regulatory and statutory environmental requirements. Prevent source of pollution and demonstrate continual environmental performance. We will communicate this Environmental Policy and importance of Environment Management System to employees, contractors, and suppliers to ensure their

peace of mind.

has an aerated nozzle. This gives the user a fine aerated spray of water.

awareness of our commitment to the environment. We will provide appropriate training to all employees to ensure their continuing awareness of environmental responsibilities.
