Pull-Out Spray

A pull-out spray increases operating radius of the mixer and offers different sprays. Uno kitchen mixers also feature 2 spray options: Standard and Vege.

Swivel Spouts

Smooth movement of swivel spouts offer easy handling.

Mains Pressure

Mains pressure water system means that the cold water and the hot water pressure is high (generally 350-500kPa). When the hot water is fed through a mains pressure hot water cylinder, a mains pressure only tap or multi-pressure tapware can be used.

Multi-Pressure

Unequal water system means that the cold water pressure is higher than the hot water pressure. In most cases the hot water could be as low as 35-120 kPa and fed through a low-pressure hot water cylinder, while the cold water pressure may be 500kPa. This type of pressure system requires a tap suited to multi-pressure.

WELS Rating System

The WELS rating is indicated by the number of stars displayed; the more stars shown, the more water efficient the product is.

5 Stars ★★★★★★

6 Stars ★★★★★★★
