# One vision, one legacy

American Standard was formed after an amalgamation of two industry leaders in their own rights – American Radiator and Standard Sanitary.

Since its inception in 1875, Standard Sanitary has pioneered many plumbing product improvements including enameled bathtubs, toilets, sinks, electric dishwashers, even adding colour to bathroom fixtures. By 1930's, Standard Sanitary was leading the sanitation and plumbing industry.

American Radiator, on the other hand, dominated the heating equipment market and was the largest supplier of heating equipment in the world.

In late 1929, the combination of both the entrepreneurial flair of American Radiator and innovative spirit of Standard Sanitary laid the foundation for what American Standard stands for today.

## JOHN PIERCE FOUNDER

The roots of American Standard's innovation legacy can be traced back to a tiny tinware shop in Ware, Massachusetts, where John B. Pierce, an optimistic entrepreneur, purchased a tinware shop for \$2800 in 1872. With determination, a fresh coat of paint and an unwavering vision for the future, Pierce forged the beginning of a proud legacy that has made American Standard one of the most enduring and trusted brands in the industry. Since its humble beginnings, American Standard has led a pivotal role in redefining today's bathrooms by pioneering innovations – making modern bathrooms accessible to all.

# Defining moments, rewriting histories

1870's

### Rise of Public Health

The advancement of sanitation has been important in the history of public health. In 1875, James Arnott and Francis J. Torrance from Ireland founded Standard Manufacturing to make cast-iron water closets, washstands and bathtubs for the growing sanitation and indoor bathroom market.

Clarence Mott Woolley, forms American Radiator Company in 1892.

John Pierce purchases tinwork shop in Massachusetts in 1872. Forms Standard Sanitary in 1899.

AMERICAN RADIATORS

1910's

### Expanding The Product Line

In 1913, American Sanitary purchased the Great Western Pottery Company and began producing enameled porcelain products. The company began selling a complete line of cast-iron enameled kitchen sinks in 1917 after a successful launch at the Pittsburgh Annual Exposition.

1930's

### Mega Merger Forms One-Stop Shop

While Standard Sanitary dominated the sanitation and plumbing industry, American Radiator, led by Charles Woolley, was the world's largest supplier of heating equipment. In late 1929, both companies merged to form American Radiator & Standard Sanitary Corporation; creating a single source for craftsmen and driving greater demand for heating and plumbing products.

AMERICAN RADIATOR & Standard Sanitary CORPORATION

1890's

### The Growth of The Modern Bathroom

Alongside Standard Manufacturing, two companies producing enameled sanitary products were growing steadily. The first was Dawes & Myler Manufacturing which was founded by ex- Standard Manufacturing staff, Edward L. Dawes and William A. Myler. The other was Ahrens & Ott Manufacturing, set up by Theodore Ahrens and Henry L. Ott. In 1899, all three companies merged to form Standard Sanitary that led the expansion of the bathroom market and made modern bathrooms accessible to all.

Standard Sanitary

1900's

### Cornering The Market

By 1900, Standard Sanitary had become the world's largest supplier of plumbing goods; producing more than 150 bathtubs per day. American bathroom was modernizing with the country devoting resources to public sewage and bathrooms began moving indoors rapidly.

Standard Sanitary's "Royal Albion"

"Standard" PLUMBING FIXTURES

### The Sanitary Advantage

In 1883, Standard Manufacturing perfected a process to coat pulverized enamel onto hot castings to form a smooth, white surface that was easy-to-clean and impervious to water— preventing corrosion and bacteria from forming and multiplying on the sides of metal tubs.

John C. Reed developed a process he patented to enamel tubs quickly and helped Standard Sanitary rise as the nation's plumbing leader.

1880's

1920's

1940's

### Supporting The War Effort

By 1943, American Radiator & Standard Sanitary virtually halted all peacetime production to supply the armed forces with critical parts and munitions including the mould and castings for the B-29 Superfortress bomber. By war's end, the company had produced more than 2.5 million hand grenades and 75 million cast-iron nose pieces for bombs. A shortage of labour and materials in the post war years forced the company to put products on allocation as demand far outpaced available production.

American Radiator & Standard Sanitary advertised hope during wartime production.

### The Bathroom Comes of Age

White has been the colour of choice in American bathrooms. It was clean, bright and sanitary. But in 1926, colour made its first appearance in bathroom fixtures from Standard Sanitary. Suddenly style entered the bathroom with a new attitude that made it an integral part of home décor.

1950's

### Peacetime Boom

The housing industry recovered quickly after WWII as affordable housing was required for millions of returning war veterans. The new suburbia was born, and with it the expansion of plumbing products. In 1951, American Standard had moved into the kitchen; introducing steel sinks, steel walls, base and specialty cabinets, automatic dishwashers and electric food waste disposers.

Popular enameled steel kitchen sink with integrated food disposal system.

1970's

### Turbulent Times

By 1971, American Standard sales reached \$1.4 billion with 70,000 employees. Despite a turbulent economy that led to a decade of controlled growth and expansion, the company grew worldwide. By 1979, it was operating in more than 20 countries and claimed the title as the world's largest plumbing manufacturer.

Refurbished Radiator Building

1980's

### The Go-Go Days

By the eighties, sales reached a record high of \$2.7 billion and innovation continued to drive market leadership. The company introduced Americast® in 1987, a game changing material that was lighter than cast-iron and more durable than enameled steel, and the Sensorium, the first tub with electronics that controlled in-home appliances.

Made of three layers, enamel, metal and composite backing, this is no ordinary tub. Americast® is lighter than cast-iron and just as strong, making tub installation easier.

### New Products For a Modern World

The sixties was a growth era for American Standard. The company expanded its product offerings, and ventured into new markets and technologies. Innovations included the now ubiquitous "push and pull" faucets, slip-resistant bathtubs, odour-removing Vent-Away toilet systems and remote control drain pop-ups. In 1968, a technological breakthrough in ceramic dish valves was added to American Standard faucets – promising leak-free operation for life.

Years of trouble-free performance were made possible through American Standard's patented ceramic-disc technology and washerless faucets.

1960's

1990's

### We Want You to Love Your Bathroom

Americans turned their attention to creating stylized living spaces that offered a sense of comfort, retreat and relaxation. American Standard joined the renaissance by acquiring Porcher, a French-based luxury brand and a German-based faucet brand called JADO. In addition, new suites and product lines were added to attract style-minded consumers.

TODAY

### Fresh Ideas For a New Generation

In 2013, American Standard joined the LIXIL Group of Japan, one of the world's leading building products companies. With annual revenues exceeding \$16 billion, LIXIL is a family of brands with leading market position in windows, doors, exterior curtain walls, and of course kitchen and bathroom products.

LIXIL

### Clean is the New Green

Innovation is our top priority at American Standard. Our latest introductions bring new levels of style and performance to our customers and continue to raise the standard of comfortable, beautiful, healthy and convenient living.

DOUBLE VORTEX  
Maximum flushing performance, minimum water usage

PROGUARD  
Guards against water stains

ECOSTART  
Provides up to 30% energy savings

COMFORTCLEAN  
Effectively kills E Coli Bacteria

CLICKMOVE  
Provides 40% water savings with ease of control

### Good Design Award 2014

American Standard wins 2014 Good Design Award for its Acacia Evolution basin mixer.

GOOD DESIGN AWARD 2014

### Creation of American Standard Brands

American Standard Companies, Inc., the parent company of American Standard announces break up. In 2007, Bain Capital purchased American Standard Global Bath and Kitchen business while Sun Capital bought over American Standard Americas, which led to the creation of American Standard Brands that included the integration of Eljier, Crane Plumbing and Fiat, all Sun Capital companies.

2000's

# FLUSHING TECHNOLOGY

## Raising the Flushing Standard

Maximum Flushing Performance,  
Minimum Water Usage

The design of the bowl propels the water forward and creates a strong flushing momentum.

### DOUBLE VORTEX

Maximum flushing performance, minimum water usage.

## Bathroom solutions

American Standard has led the way in developing innovative sanitary products and continues to do so. It is this tradition of quality and innovation that spearheads the intelligence behind every American Standard offering.

### COMFORT PUSH BUTTON

A larger surface area for ease of use

### PROGUARD

Guards against water stains

### DOUBLE VORTEX

Maximum flushing performance, minimum water usage

### SKIRTED DESIGN

Premium Design allows for quick release and easy exterior cleaning

### RIMLESS CLEAN

Hygienic and easy to clean

### SOFT CLOSING SEAT & COVER

Gentle and quiet closing action

### EASY RELEASE

Easy removal for thorough cleaning

### COMFORTCLEAN\*

Effectively Kills E Coli Bacteria

### RASIED HEIGHT

Easy to get on and off, especially for the elderly, pregnant and disabled.

### EASYSILENCE

Silicone aerator allows easy removal of limescale or dirt

### AIRNERGIZE

Air-infused water provides a luxurious shower experience while using lesser water

### TWISTFREE

Prevents shower hose from entangling

### WATER SAVING

Water-saving for ecological and economical sense

# Clean is the new green

'Green' is more than an aspiration at American Standard. Our green efforts are evident in the clean technologies that we place in our products. Each thoughtful innovation is committed to safeguarding our planet.

The problem of water scarcity is a growing one as the world's population puts mounting demands on limited supplies. Never has it been more pressing to introduce clean technologies that will ensure an ecological balance. By reducing water consumption, minimizing the use of harmful detergents and cutting down on energy use, American Standard products aim to protect our precious planet, so that our future generations are assured of a clean and green environment.

# Quantitative research, quality assured

No other single factor in the history of public health is as important as the advancement of sanitation.

At a time when people were first bathing in metal tubs, American Standard perfected a process to coat pulverized enamel onto hot castings, creating an impervious surface that prevented corrosion and bacteria from forming on the metal tubs. This quickly elevated the company to a plumbing leader status.

We also introduced colour into bathroom fixtures when white was the norm in American bathrooms, creating stylish plumbing fixtures fit for conversations.

Decades of research go into every single American Standard innovation. From our ubiquitous “push and pull” faucets which offered easier “one-hand” operation, skid-resistant bathtub for better safety, wall-mounted toilets designed to make cleaning under the toilet easier, to our patented breakthrough ceramic disc valve technology for leak-free faucet operations, we have earned the trust of our customers for over a century.

Today, we continue to innovate, introducing energy-saving Eco-handle faucets, water-saving Airnergize showers, powerful Double Vortex flushing, and stain-resistant Proguard technology.

With worldwide presence in over 20 countries, manufacturing and research facilities in Asia and a strong design team, we make it our business to deliver peace of mind to ensure reliable performance every time, anywhere.

# Bathroom collections

## **CLASSIC, CONTEMPORARY, MODERN**

The bathroom has come of age. From being a mere functional cleansing room, it has evolved into a private haven for the individual. Our Bathroom Collections enable individuals to express their personalities and create their own private sanctuaries.

### **Classic**

With a preference for conservative aesthetics, Classic collections embrace 'established design', quality and elegance. With a healthy respect for tradition and formality, emphasis is often placed on style-longevity.

### **Contemporary**

Robust materials and humanized aesthetics combine to provide simple, valuable solutions for everyday needs. With this style, there is a distinct practicality with a penchant for harmonious design.

### **Modern**

This style amplifies simplicity and clarity, with no need for exaggeration or excessiveness. Intuitive products that are just as easy to use as they are emotionally designed with the latest trends in mind.

From modern and contemporary, to timeless classic designs, you can be sure to find your personalized style at American Standard.

# EasySET

## Collection

EasySET is designed to elevate your shower experience to a brand new level of enjoyment and convenience. By integrating ergonomic designs and smart engineering, a comfortable and relaxing shower is now an everyday experience with just a convenient push of a button.

Customize your perfect shower by simply pre-setting your preferred water source, temperature and volume of water and enjoy the same shower experience each time.

# Acacia Evolution

## Collection

Evolution itself is in a constant state of change, morphing into more relevant form to adapt to time and space. After a decade of enduring and celebrated success from its Acacia predecessor, Acacia Evolution marks the dawn of a new era. In a time where technology defines the way we interact, work and live, Acacia Evolution is designed to meet these needs. Where design and technology co-exist symbiotically, blurring the lines of form and function.
