Importing European Inspiration

Established in 1987 and proudly New Zealand owned and family operated, Robertson import Europe's most innovative bathroom products.

But we do more than that - we import ideas, creating opportunities for New Zealand architects and designers to innovate and reinvent the bathroom space. Through our collection of brands, we deliver a promise of breathtaking design and guaranteed quality, backed by industry-leading service and support to help realise the perfect design.

NOTE: Zucchetti products are indent only. Please contact us for availability.

An Italian design history

**Zucchetti: a name, a family,
and a world-leading
industrial design company.**

In the company's 85-year history three generations have been at the helm of Zucchetti: Alfredo, who founded the firm in the now distant 1929, his sons Luciano and Mario, the forward-thinking architects, and his grandchildren Elena, Carlo, Marco and Paolo, who run the business today.

Since its earliest years the company has rigorously followed a set of guidelines: always make the most of your human resources, be innovative, and constantly update your technology to guarantee the quality of the products, services and consulting you provide.

Today Zucchetti is synonymous with innovative, 100% Italian-made bathroom and wellness products. It is a company with a unique history, skills and expertise, which together form a solid base to tackle the challenges of the various international markets, incorporating different interests and cultures, with the same attitude and pioneering enthusiasm that set the business apart when it was in its infancy.

The company's international vocation has seen it spread to over 80 countries worldwide.

**Water and words,
a shifting universe
that turns hopes and dreams
into reality...**

Elena Zucchetti, who runs the historic Italian company tells us about her world: "Thanks to the passion and experience that stem from Zucchetti's long history, over the years the company has made a significant contribution to the major changes that have occurred in the home bathroom. In addition to changes in form and space, the way each of us lives our lives has also changed. We work hard every day to imagine new scenarios, anticipate trends and develop innovative designs and products. We are a design-oriented company that believes in original ideas and experimentation, and we rely on the talent of our staff and vast technological expertise to produce cutting-edge designs that express the full range of our thoughts and dreams.

Our collaboration through the years with numerous world-renowned designers has been a great asset to the company. Since the 1970s we have always chosen to work with the people who could best interpret our vision: from Mario Oliveri at Studio Nizzoli, who in the early 1970s focused on giving industrial products a visual identity, to Giorgio Marianelli and Raul Barbieri, who, first together and then individually, took us into the 1990s, and onto Matteo Thun and Antonio Rodriguez and Ludovica+Roberto Palomba.

These are people with open minds, who, drawing inspiration from water itself and from the world around us, worked together with us to design products that are innovative both in form and function and which have become truly iconic: beautiful to look at, simple and effective to operate, and capable of stirring emotions day after day in those who use them. This is a challenge we face every day, but that we think we have overcome many times, thanks to the success we have achieved and the recognition gained through the countless international awards we have received: the Compasso d'Oro, the Good Design Award, Red Dot, Design Plus and many more. Thanks to its strong cultural identity, today Zucchetti is internationally recognised as an historic Italian design brand, and an attentive exponent of modernity.

I've always liked to ponder the way children see a tap: a surprising, enchanting object, a metal sculpture that with a simple touch turns into fresh, lively, energy-filled running water, offering a sense of wellbeing. Each of our designs is created to fully involve all the senses and to offer unique and exciting sensations."

A finish for every occasion

With a growing need for more individuality and personalisation in today's bathroom design, Zucchetti offers a new set of finish options that are ideal for both traditional and contemporary settings. From shades of gold for a more classic look to black and white for its design collections, designers and architects are now able to create their dream bathroom whatever the style.

Produced in Zucchetti's Italian facility using the galvanic process guarantees perfect product quality and optimum durability over time.

In addition to the metallic finishes, the Pan collection offers painted colours in embossed matt white (W1) and embossed matt black (N1) while the Closer shower head features a velvety black soft touch finish (N7) for even more creative freedom.

A range of new finishes that allow the designer to create refined and personalised projects.

Brim

Design **Ludovica+Roberto Palomba**

“Brim is the result of research into shape that started a long time ago and of a follow-through that has teamed modernity and simplicity of geometrics. Brim is the synthesis and the sum of an industrial design project that began with the Soft mixer and has evolved according to ever-modern canons, managing to tune opposing geometrics to achieve perfect proportions.”

Ludovica+Roberto Palomba

Reassuring and essential, the brand new Brim collection stands out for its compact design that uses a single lexicon to elaborate two different shapes: the circle and the square. The outcome of these efforts is a complete series of single-lever mixers with harmonious proportions and delicately rounded lines.

PAN

Design **Ludovica+Roberto Palomba**

“The Pan collection is our interpretation of the basic cylinder type single lever mixer, which begins with classic archetypes and goes on to develop completely original aesthetics and new types of taps. We focused our attention on the joint between the vertical and horizontal elements: as in nature there are no cuts and weldings, so that the spout and handle are derived from the body of our tap, through a soft connection, designed like the trunk of a tree, according to exactly the same smooth logic found in the graft between the trunk and the branch of a tree.”

Ludovica+Roberto Palomba

JINGLE

Design **Ludovica+Roberto Palomba**

“Compact and squared, user-friendly and on-trend, Jingle is a modern project, because it is simple and immediate. We wanted a pure object, where even the construction detail of a pipe or a chamfered edge, in the right proportions, expressed design. With a rather “Castiglioni-like” simplicity, Jingle is a young object in every sense.”

BELLAGIO

Design **Matteo Thun and Antonio Rodriguez**

“Bellagio is more than a simple tap, it is a way of viewing the bathroom as a place of refined elegance, it is a timeless element of the decor which confirms its metropolitan and contemporary personality in any environment. It is aristocratic and exclusive, a citizen of the world, despite having such an Italian name, testimony of the industrial background in which it has been created. It is not retro, it is not the revival of a style - it is Bellagio, maybe even a stylistic “category maker”. Bellagio is a woman, despite its masculine name. And if we were to describe her, she would undoubtedly be a cosmopolitan woman, cultured, refined, eclectic, vain and, above all... beautiful!”

Kitchen

The contemporary kitchen environment is traditionally the theatre of daily life. It is a place to gather in and to meet socially where you can enjoy good foods and wines in an informal manner while having a light chat. A convivial place to share with friends for lingering as long as possible together where you can rediscover the pleasure of cooking thanks also to the harmonious and ergonomical designs of its furnishings and tools. As a result Zucchetti products stand out as contemporary and functional objects with character designed for a constantly evolving environment in which even the details play a leading role.

Showers

Zucchetti views the shower as the beginning and centre point of the bathroom, as a wellness place dedicated to the care of oneself. By combining the technology, style and luxury of the Zucchetti ceiling mounted rain shower, even the daily routine can be a subtle pleasure.

SHOWERS

WATERCANDY

Design **Ludovica+Roberto Palomba**

The new WaterCandy shower head designed by Ludovica+Roberto Palomba for Zucchetti has a strongly innovative look that immediately reveals its eclectic character. The revolutionary element is the hand-shower, which as well as performing its traditional function can also be used to massage the body. The back strap makes it possible to hold the shower in a simple, ergonomic way whilst the silicon nozzles are designed here to also be used for a light massage.

As an ideal extension of the hand, the water is free to follow the body in the space, either from a chosen distance or completely cancelling the distance by bringing the nozzles into direct contact with the skin.

Z94750

3 jets handshower for body massage: pulse, rain, combined. Equipped with silicone handgrip nozzles in soft silicone. Flexible hose in PVC with 1/2" adapter and adapter for standard cones and slide bar. WELS 4 star
