BRUSHED SURFACE

AL = Brushed Hard Graphite

DL = Brushed Warm Sunset

GN = Brushed Cool Sunrise

EN = Brushed Nickel

WHY IS A PVD COATING SUCH A VASTLY SUPERIOR FINISH?

The new colours of our GROHE SPA Colour collection are produced with PVD technology. Now what makes GROHE's PVD technology so much better than common chrome plating? To begin with, all PVD coated colours are extremely uniform because of the absolute evenness of every layer.

Unlike normal electro-plated finishes with their very limited range of colours, our PVD finishes offer you flexibility and choice with the wide range of colour options. You can simply choose the one that suits your interior design strategy best.

With our PVD coated products, we not only created highly aesthetic colours, we also made these colours more durable than ever. The adhesion of the coating

plays a vital role in ensuring a beautiful and long lasting finish. Our PVD process achieves six times greater adhesion. An ordinary electro-plated surface just can't compete. All our faucets are highly resistant to abrasion and resilient to hard knocks. This guarantees that our consumers will enjoy using these high quality faucets and mixers for years and years to come.

At GROHE we are not only passionate about bathrooms and kitchens, we also care about the environment. In order to be as environmentally friendly as possible, we use no harmful chemicals in our PVD technology.

All our PVD finishes are highly resistant to abrasive cleaning materials.
The 15 Year Warranty includes finish for Domestic and Residential use (including Hotels).

UNIQUE GROHE CRAFTSMANSHIP IN EVERY LAYER
