

OUR COMMITMENT TO SUSTAINABILITY

At Robertson Bathware we care deeply about the planet and about safeguarding our precious natural resources. While we strive to create beautiful, high-quality bathroom products, we also take our responsibility to protecting our environment very seriously.

That's why we pledge an ongoing commitment to limit the impact of our activities on the environment, and to provide a safe and healthy workplace for our employees.

Our goal is to integrate sustainable practices into every aspect of our operations, from the design and development of our products, to their production, packaging and distribution. We also educate our employees about sustainable practices they can implement, and seek to work with suppliers and partners who share our environmentally responsible values.

DESIGN

Our product innovations favour not just performance, but the use of clean technologies and features that reduce water consumption, minimise the need for detergents that damage our waterways, and cut down on energy use. We also consider the lifecycle of our products to ensure they incorporate the economic use of resources, are safe and efficient, and are designed to last.

PRODUCTION

We carefully consider the efficient use of resources during the manufacture of our products and work to minimise toxic emissions from our plant, and the fleet we use to distribute our products. Robertson Bathware works to minimise waste by continuously evaluating our operations and ensuring that they are as efficient as possible. We participate in recycling to reduce our impact on landfills and promote recovery of valuable resources.

PARTNERS

As far as possible, we look to partner with businesses and source our product range from organisations that share our sustainability values and practices.

EMPLOYEES

Our staff are trained and informed about the role they play in environmental protection, and in meeting occupational health and safety requirements. We encourage them to recycle, reuse and reduce their waste, both in the workplace and at home.

Robertson Bathware strives to continuously improve on our commitment to these sustainability promises. We welcome feedback and suggestions from our customers and partners on ways we can further enhance our ability to use natural resources wisely and protect our precious planet.
