REFRESHING SOLUTIONS

ESSENCE PROFESSIONAL SINGLE-HANDLE KITCHEN FAUCET

Clean lines and cylindrical modern design make the NEW GROHE Essence the natural choice for today's cosmopolitan kitchen. The extended comfort spout height embodies minimalist beauty in its purist form, while the pull-out dual spray with toggle function allows for seamless switching between spray and regular water flow. Furthermore, the forward-rotating lever handle eliminates backsplash interference.

In addition to the new 28mm cartridge that allows for a sleeker, more refined body, the integrated temperature limiter can be individually set to the desired maximum water temperature to prevent scalding.

The colour hoses shown are each sold separately and can be easily installed to replace the original hose.

EASYSET BODY
JET CONTROL

Where Comfort Meets Convenience

Indulge in the ultimate showering experience that never forgets your preferred water source, temperature and volume of your perfect shower.

With the convenient push of a button, you can experience a cascading shower head or invigorating hand shower with body jets, all while maintaining control of the water volume with an easy turn of the dial.

Once you've selected the desired water volume using the intuitive dial, there's no need to reset it again. For an even more fuss-free experience, you can install the PreSet control outside your bathroom and activate it with just one easy push before stepping into your shower.

If you plan to have hand showers, overhead showers and body jets all in one bathroom, EasySET gives you the flexibility to configure your dream shower so that it looks as good as it feels. The intuitive showering icons let you see exactly which EasySET option controls each shower outlet.

The EasySET thermostatic mixer provides a constant showering temperature, while the safety temperature control and auto shut-off function prevents accidental scalding should the cold water supply fail.

DESIGNER FOCUS

American Standard has recently appointed Antoine Besseyre Des Horts to lead the iconic sanitary ware brand's team of designers to create American Standard's dream bathrooms. Besseyre holds a Master's in Industrial Design from Nantes Atlantique Design School (France). He previously worked closely with Mr Paul Flowers at Grohe AG where he designed numerous successful collections for the European, American and Asian markets, and was part of the Grohe design team that won the prestigious Red Dot Design Team of the Year award.

Known to draw his design inspiration from the details of everyday life, his penchant for employing a user-centric creative process will continue to be the ethos of his design team at American Standard.

PROJECT FEATURE

REFLECTING HERITAGE AND STYLE

DEVELOPER
Nigel McKenna
Templeton Ltd

DEVELOPMENT MANAGER
Cyrus Greenbank
Development Advisory Services

ARCHITECT/LEAD DESIGNER
Jennifer Hanson
A Studio Architects

Heritage buildings of the calibre of the 1912 Mt Eden Council Chambers and the Mt Eden Fire Station, build in 1925, are rare in Auckland. As a pair these buildings are unique, and the aim of the project was to restore them, reflecting their eras and styles, so that they would last another century.

Chambers and Station comprises two historic, culturally and architecturally significant heritage buildings, preserved and developed into six luxury apartments. The original impressive interiors were restored to keep the historic character of the buildings.

The design philosophy was to retain and enhance the original heritage values of the buildings despite the adaptations required for a drastically new use.

It was considered important to retain the separate characteristics of each of the two buildings while still creating a functional link between the Council Chambers and the Fire Station.

A new link was designed in structural glass using lightweight construction techniques in order to ensure that the heritage buildings remained dominant.

To bring the original structure up to seismic requirements, while retaining the heritage facade, a series of structural steel cross-bracing, ceiling and floor diaphragms was installed.

A mix of eye-catching design details, together with the use of high quality products and restoration methods have ensured that the buildings were finished to an exceptional standard.

The bathrooms feature natural stone and white marble, with charcoal porcelain floors and high-quality chrome and matt black European tapware.

The completed apartments boast large living areas, bespoke architecture and design that is thought out in every detail and aspect. The two penthouse apartments offer great views west and towards the city.

EVOLVE FURNITURE A CONTINUAL EVOLUTION

The ever popular ELEMENTi Evolve furniture collection now combines a pure white finish. This, in combination with the minimalistic profiling where handles are replaced with angled drawer profiles, helps achieve a sleek centrepiece for your bathroom. What's more, Evolve furniture is expertly finished with superior New Zealand craftsmanship, and incorporates high quality componentry.

A durable quality finish

Environmentally certified moisture-resistant particleboard combined with a quality Melteca finish deliver a highly durable and easy-clean surface.

Evolve furniture is available in either Designa White Gloss, Seasoned Oak or Oiled Legno. When ordering add finish code to furniture code (e.g. 600 Evolve Seasoned Oak: 28462.SO)

Full extension soft close drawer technology

Evolve vanities incorporate Hettich full-extension drawer runners with integrated soft-close technology. All Hettich hardware also comes with a lifetime warranty.
