	BPIR - B2.3.1 Durability	This product complies with Building Code Regulation B2.3.1 Durability

Infuse some modern and sophisticated charm into your bathroom with the Elementi BARE Vessel Basin Prego Oval. The beautiful basin blends the subtle warmth of light color with the harsh, raw beauty of concrete to create a striking design focal point in any bathroom. The basin is thoroughly hand-finished with an emphasis on detail, working in tandem with the inherent nature of the concrete so that each piece is one-of-a-kind.

With Engineered Cementitious Composites (EEC), the BARE Prego Oval Basin is more durable and stronger. The crack-resistance from EEC's strain-hardening behavior and its tensile ductility make the basin much better than regular concrete. The sealer used on the basin is heat and stain-resistant, keeping it protected against wear, heat, and stains for a long time without affecting its smooth, glossy appearance.

15kg heavy and oval shaped, the BARE Vessel Basin Prego Oval is well suited for light commercial and home use. The basin is suited to kitchen, bathroom, and laundry applications within hotels, motels, and retirement villages where functionality and beauty are needed. Special colours may also be produced on order over a four-week production period so that you may obtain the colour that will perfectly suit your bathroom.

New Zealand-designed and constructed, the basin is included with a 5-year guarantee (2 years commercial), assuring durability and confidence. Having a domestic or commercial setting suitability, the Elementi BARE Vessel Basin Prego Oval provides a trendy, contemporary look for any bathroom.
